

DUCHESNE-STRAWBERRY RIVER DISTRIBUTION SYSTEM

1957 ASSESSMENT

\*\* \$ 6,250.00 \*\*

BASIS OF ASSESSMENT

The minutes of the 1957 Annual Water User's Meeting stipulate that the State Engineer is to assess all listed water user's of record in his office on the Duchesne-Strawberry Rivers at such a rate (acre-foot basis) as will produce \$6,250.00.

CALCULATION OF ASSESSMENT

(Note: Based upon a one-year delivery of water by the Commissioner, such report being so submitted to the State Engineer. This is the first year which is being so assessed by the State Engineer for this particular River System.)

Total acre-feet of water delivered in 1956 to the various user's as reported by the Commissioner was: 254,824 acre-feet and \$6,250.00 divided by 254,824.00 equals \$0.0245267322 cost per one-acre foot of water for each water user's pro-rata share of the 1957 assessment.

PROOF

\$0.0245267322 times 254,824.00 acre-feet of water equals \$6,250.00.
